

Social and Club June.
FRIDAY MORNING. OCT. 6.

The County Fair,
Will hold its Annual Meeting, and Exhibition of Agricultural Products and Fine Arts next week, commencing on Monday. The grounds just south of the village, contain about six acres of land, and no finer place for a show of this kind can be found in the State. All praise is due to the Committee of Arrangement, who have spared no time, labor or expense, to fit it up in a suitable manner. A building of ample dimensions has been erected upon the north end of the lot for the display of flowers, fruit, grain, roots, and domestic manufactures, while abundant space upon the outside, and within the enclosure, will afford room for Stock and Agricultural Implements. A high and tight board fence surrounds the whole. We have now a "fair ground" surpassed by no county in the State. All we have now to do, is, for the citizens to come out with their best cattle, horses, rata bags, handsome daughters, cabbage, and such like, and we shall have a show that Van Buren County will not be ashamed of—Let us all be out on the day of the Fair.

School Meeting.

The Annual School Meeting of the Union School District, in this village, was held last Monday evening. The officers elected for the ensuing year, were, S. H. Blackman, Moderator; Charles Seleck, Director, and J. M. Eastman, Assessor.

The number of children reported between the age of four and eighteen, were two hundred and seventy-five, being an increase of twenty-six since the last meeting. It was voted to raise fifty cent on the scholar, in addition to the mill and Primary School Fund, for the support of the school the present year.

The Circuit Court is now in session in this village. A large amount of business, both civil and criminal, has already been disposed of, and we believe considerably more yet remains upon the calendar. It will probably wind up next week. We shall give some report of the proceedings next week.

The report of the proceedings at the Republican County Convention will be found in the issue for our last week's issue; they will be found in our column today.

Our paper appears "below the trees," this week, in memory of the death of our foreman. Our foreman, we trust, will bear with us till we again print.

Mr. Ulrich.—The calendar is here and calendar. This is the eighth calendar change, according to the Roman year and thirty-five bimonthly. I would advise in times to look out on the 18th, 19th, 20th, 21st and 22nd of this month. What heavy weather we will have, will be seen this day, the sun at the time is to be.

I will give daily notice for November another. W. W. BY AM.

PRINCIPAL BRANCH OF CLEVELAND.—Mr. B. Stedman was keeping the Edwards' House at Plymouth where he was doing a prosperous business at the time of his tragic death, which occurred under the following circumstances:

A Mr. Tibbits, who kept livery stable

was standing in front of the Edwards' House when Mr. Stedman drove up unlighted from his carriage, naked. He did not say why he was using his influence against Edwards' House. A warrant of apprehension was sprung up, followed by such threatening menaces from Tibbits who in a fit of passion had stabbed his own brother, year ago, that Stedman gave him a blow. Tibbits at once plunged a pruning knife into Stedman's body, the knife entered just above the left groin, making a wound three inches in length, and passing right through the intestines by an inch gash. Stedman was soon aware of the fatal consequence and very calmly made every preparation for the event, being perfectly composed and resigned. He fully manifested forgave his murderer, who is effected almost to insanity, and whose family are distressed beyond description. Tibbits is under \$1,000 bonds to answer the charge of manslaughter. He leaves a wife but no children, and many ardent friends to mourn his untimely death.—*Cleveland Plain Dealer*, Sept. 22.

PURCHASE OF SONORA.—It is said by some of the better writers, that influential parties from California and Arizona were at Washington, soliciting the Government to purchase Sonora. In the view of a condition of Mexican affairs, we should suppose any such negotiation would be difficult, yet we are told it has already been commenced. Mexico would probably be willing to sell, if there were any responsible government to speak for her, and no one doubts the readiness of the present administration to buy, though the country is chiefly populated with wild Apache, and can be no earthly use to us at present, unless for the accommodation of the prospective territory of Arizona, and the speculators there especially, who want the port of Guaymas for their accommodation. We shall not be surprised however to hear of the purchase of Sonora at the first opportunity, and of Simlos also, wholly or in part, "regardless of expense."

Murphy against Harwitz.
The correspondent of the New York Times writes:

The great chess match between Germany and America, between Mr. Harwitz, of Prussia, and Mr. Paul Murphy, of the U.S., is now going on in this city, at the Cafe de la Regence, in the Rue St. Honore, the head quarters of the lovers of the scientific game. The match is to be won by the winner of the first seven games. Mr. Harwitz gained the first two games; Mr. Murphy gained the next three—the last of which was played yesterday afternoon and evening and evening. In the third and fourth games, Mr. Murphy made some of the most brilliant and startling moves that had ever been seen in the Cafe de la Regence; and so great was the enthusiasm, that telegraphic dispatches were sent to the Alhambra, to Mery, to the Duke of Brunswick and other great players, begging them to come and see the wonder of the world. Notwithstanding we are in the midst of the watering season, when all the fashions is supposed at least to be out of town, the Cafe de la Regence is the scene of a crowd, or rather a mob, of distinguished men, and even women, of all nationalities and all tongues. It is believed that Murphy will beat Harwitz, though it is not by any means sure; and in that case he becomes the champion of the world; for no man in Europe can beat Harwitz. Harwitz is 27 years old; Murphy but 22. Murphy plays much faster than Harwitz, and in fact, faster than any adversary he has yet met in Europe, and the boldness and originality of his moves strike the lookers-on with admiration and admiration.

Irish Religion: Regarding your neighbor's faith with a most irreligious

Fever and Ague,

from which mankind suffer over a large part of the globe, is the consequence of a disordered action in the system, induced by the prolonged action of vegetable decay. This exhalation is excited by the action of solar heat on wet soil, and disseminates the watery vapor from it. While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lungs into the blood, where it is disseminated throughout the entire system, and acts upon the body. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the vital force is exhausted, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system. The liver becomes torpid and does not secrete not only this virus, but also the bile fluid. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the body is run down entirely, and the infection continues throughout the whole body of the system.
